specify territories	<i>Event was in Pazin but some of them were related for national level (e.g. new legislation about nearly zero energy buildings and available funds) and european level (Fire Safe Europe campaign)</i>

## Report:

### Aim of the event:

City of Pazin is member of *Croatia green building council* so Pazin supported their organisation of “Green talks” mini symposium.

Symposium was intended for architects, civil engineers, public administration and other relevant stakeholders and interested groups.

Professionals from Ministry of construction and physical planning, The Environmental Protection and Energy Efficiency Fund, Fire safe Europe, etc. had their lectures about available funds for energy efficiency, savings and European goals reaching (CO2 emissions,...)

Some lectures were about possible measures for nerly zero energy buildings and one of the most important information was about Directive 2010/31/EU about energy efficient buildings.

### Specific SEC ADAPT Partners activity (presentation, participation to workshop, poster etc)

LIFE SEC Adapt project leaflets were presented and Head of Department for communal system, physical planning and construction of City of Pazin in his speech introduced all participants in specific project objectives. Also, they all were informed that Risk and

vulnerability assessment is ongoing activity and the final result will be Climate change adaptation plan on local level.

### Lesson learnt to spread with LIFE SEC ADAPT partners:

- Advancing NET Zero (Croatian green building council is member of World Green Building Council)
- Ongoing campaign by FireSAFE Europe (petition for improvement fire safety in buildings)
