## Report:

### Aim of the event:

This Forum has as a fundamental objective the development and innovation of renewable energies in Murcia, because this is one of the essential measures for adaptation and mitigation the Climate Change.

Therefore, it was necessary to advertise the reality of the problem in a regional level.

### Specific SEC ADAPT Partners activity (presentation, participation to workshop, poster etc)

Presentation about the Life SEC Adapt and ACT projects.

### Lesson learnt to spread with LIFE SEC ADAPT partners:

Murcia, it can be defined such as "cero zone" of the Climate Change, according with the explications of the representatives of the Association New Culture of the Climate, in Spanish 'Nueva Cultura por el Clima', during the presentation of the new proposal of Law for the Climate Change that promote the organization and it was presented in the regional parliament by the different political groups. For this collective, it is necessary to make decisions and act against this problematic.

For the participants in this event, the emergency of the climatic crisis is barely value in institutions. "In the case of Murcia, the situation acquires a special importance because of our geographic singularities that make us in one of the regions more vulnerable of the European continent", manifested one representative of the New Culture of Climate.

The objective of this Law of the Climate Change is to establish "the normative frame and institutional necessary to articulate the integration of the fight against Climate Change in the design, planning and execution of the public politics in the Region of Murcia".
