## Specific information

Main thematic addressed:	<ul style="list-style-type: none"><li><i>Climate Adaptation</i></li><li><i>RES (Renewable Energy Systems)</i></li><li><i>Energy Saving</i></li></ul>
type of stakeholders involved (specify numbers if possible)	<ul style="list-style-type: none"><li><i>Public Administration</i></li><li><i>Academic Institution</i></li><li><i>Business sector - professional/industry association</i></li><li><i>Business sector - Individual Consultant or companies</i></li><li><i>Individual Citizen</i></li></ul>
Territorial level	<ul style="list-style-type: none"><li><i>Regional / Local</i></li></ul>
specify territories	<i>Pesaro</i>

## Report:

### Aim of the event:

The conference Energia Natura Salute was organized by the municipality of Pesaro, with the contribution of Ton Gruppe and the patronage of the Orders of Architects and Geologists, Asur Marche and Bioarchitecture Foundation, during the European Sustainable Energy Week (EUSEW).

The theme of the conference was the integration of health issues in indoor environments, energy efficiency and natural construction materials in buildings.

Moderator of the conference was Annarita Santilli - Energy Manager - U.O. Municipality of Pesaro, and the programmed relators was:

- Margherita Finamore - New Municipal Works of Pesaro, "Energy Efficiency and Sustainability in Public Works"
- Adamo Ghiselli - geologist, "The Importance of the Use of Sustainable Materials"
- Ulrich Pinter, Ton Gruppe "Restructure and build to live in a healthy environment" and "Thermal Comfort without the use of dedicated equipment"
- Anna Rita Pelliccioni - ASUR Territorial Area1 – Pesaro, "Public Hygiene and Health Indoor Pollution: How To Avoid It"

### Specific SEC ADAPT Partners activity (presentation, participation to workshop, poster etc)

Luca Barbadoro, as technical Expert for LIFE SEC ADAPT – PESARO Municipality, introduced the Conference explaining the possibile contribution of Life SEC ADAPT to understand how the local climate is changing in Pesaro, showing results on the climate baseline analysis and the ongoing activity of Vulnerability and Risks Assessment.

In particular, it has been showed the pattern change of temperatures and precipitations in the last 45 years, and the possible implication in the building sector. Moreover, it has been shown the effect of heat in urban area of Pesaro, and how green areas and the correct use of materials and the soils permeability could coping the heatwaves problems.

Participants and Relators interacted weith questions, showing interest for the thematic.

### Lesson learnt to spread with LIFE SEC ADAPT partners:

as emerged during the conference, local stakeholders, in particulars buiding technicians and municipal services, are very interested to the local climate analysis and to discuss how effort with possible implication in the building sector.

Probably the current rules, even if actualized with recent energy efficiency EU regulations, not always taking into account the climate change impact and change in the temperature pattern during the buildings design ( eg the correct dimensioning of an air conditioning system).

The integration within the Life Sec ADAPT Project activities and local stakeholder groups meetings could be a successful instrument to spread the awareness of climate change problems, and then share the best Climate Change Adaptation coping actions.
