Territorial level	<ul style="list-style-type: none"> <li>• <i>European / Transnational regions</i></li> </ul>
specify territories	

## Report:

### Aim of the event:

The Climateurope Festival 2017 offers a varied 2½ day programme of lectures, discussions, networking and performances to explore the state-of-the-art of climate information, and its uses and value in decision-making at both the European and national levels.

A key Festival objective this year is to discuss the advantages and challenges that climate services face with the water sector, natural reserve, and agriculture and food security. Transforming climate information through services for societal and commercial success is of top importance.

Scientists, climate services suppliers and users communities will come together to share their experience and knowledge.

As a result the festival creates new, and engages existing, networks that support climate services at the European and national levels.

### Specific SEC ADAPT Partners activity (presentation, participation to workshop, poster etc)

Participation to workshop.

### Lesson learnt to spread with LIFE SEC ADAPT partners:

We add a explanatory video.
